

## Public Information

---

**P-PH 0038(48)304, Hanson County, PCN 05FA**

**SD38 - Fm E of the SD38P Jct to 8.3 E of the Alexandria Jct  
Structure # 31-122-100**

**Grading, Interim Surfacing, Modify Intersection, Pipe Work**

Public Meeting Information @

**<https://dot.sd.gov/projects-studies/projects/public-meetings>**

The South Dakota Department of Transportation provides services without regard to race, color, gender, religion, national origin, age or disability, according to the provisions contained in SDCL 20-13, Title VI of the Civil Rights Act of 1964, the Rehabilitation Act of 1973, as amended, the Americans With Disabilities Act of 1990 and Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, 1994.

Any person who has questions concerning this policy or who believes they have been discriminated against should contact the Department's Civil Rights Office at 605-773-3540.

## Public Meeting

**SD Highway 38**  
**From E of the SD38P Jct to 8.3 E of the Alexandria Jct**  
**in Hanson County**

**P-PH 0038(48)304 PCN 05FA**

Neil Schochenmaier, PE  
 Design Project Manager

November 16, 2021

1

## Purpose of the Meeting

Involve the public in the planning and design process

Provide a Project Overview

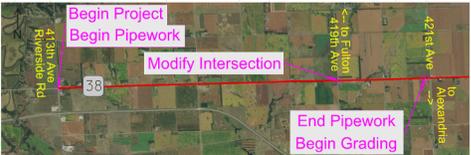

Gather Input and Comments

- Background Information
- Proposed Project
- Project Schedule

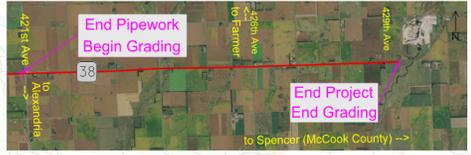

2

## Project Limits

3

## Project Limits

4

## Background Information

Grading & Structures in 1933, 1937 & 1943

Resurfaced in 2008 & 2010

5

## Traffic – Begin (Riverside Rd) to 421st Ave (Alex Oil)

2020 Average Daily Traffic (ADT) = 1874

2045 Projected ADT = 2155

6.6% Average Truck Traffic

6

## Traffic – 421<sup>st</sup> Ave (Alex Oil) to End (East County Line)

- 2020 Average Daily Traffic (ADT) = 886
- 2045 Projected ADT = 1019
- 9.7% Average Truck Traffic

7

## Crash History

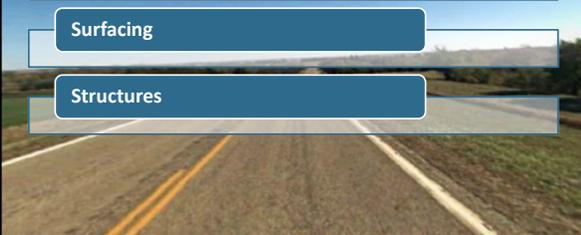

- 13 Reported Crashes
  - 1 Fixed Object Off Road
  - 1 Other
  - 1 Rear-end
  - 1 Overturn Off Road
  - 9 Animal Hits
- 0 Fatality
- 5-Year Period from 2016 through 2020
- Reported Crash Rate 1/1/2016 - 12/31/2020 = 1.57
- Statewide Weighted Crash Rate = 1.46
- Rural Principal Arterial

8

## Why We're Reconstructing

- Vertical Curves
- Narrow Shoulders
- Surfacing
- Structures

9

## Proposed Improvements

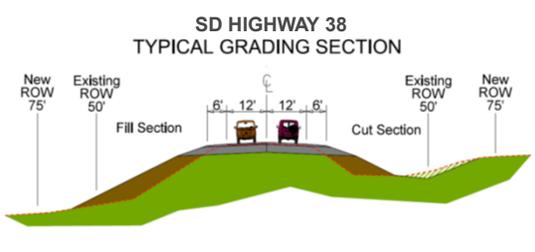

- Reconstructing Road with 6-foot Shoulders
- Replace Structure over Pierre Creek
- Replace Fence and Culverts
- Interim Surfacing (final in 2026)

10

## Proposed Typical Section

SD HIGHWAY 38  
TYPICAL GRADING SECTION

11

## Access Management

- Provide safe, efficient access to streets and highways
- By limiting the number of direct accesses to major roadways

See Handout

12

## Right of Way (ROW)

- Existing Width = 100 feet
- Purchase additional ROW for 150 feet
- Temporary Easements as needed

See Handout

13

## Encroachments

- Private Property in Public ROW** → Federal Highway Regulations for Safety
- Examples** →
  - Signs
  - Private Use (Parking)
  - Landscaping Items
- Notification** → Owners of Encroachments will be notified by the Mitchell Area Office

See Handout

14

## Utility Coordination

- Some Utilities may need to be relocated** →
  - Central Electric
  - East River Electric
  - Hanson Rural Water Systems, Inc.
  - Midcontinent Communications
  - Mitchell Telecom
  - Xcel Energy
- Utility Companies negotiate easements with landowners** →
  - Lumen / CenturyLink
  - Northern Natural Gas
  - NuStar Energy
  - SDN Communications
  - Triotel Communications

See Handout

15

## Utility Coordination

- Any Known Private Utilities?** →
  - Water Lines
  - Drain Fields
  - Septic Tanks
  - Underground Storage Tanks
  - Underground Power Lines
- Contact SD DOT**

See Handout

16

## Environmental, Social and Economic Concerns

- This project is being developed in accordance with applicable State and Federal environmental regulations.
- In accordance with the National Environmental Policy Act of 1969 (NEPA), as amended. Coordination has been initiated with State & Federal resource agencies.

See Handout

17

## Environmental, Social and Economic Concerns

**Section 106**  
Section 106 of the National Historic Preservation Act requires Federal actions to take into account the effects of project undertakings on historic properties.

**Contaminated Materials**  
Project undertaking will take into account contaminated soils with relation to existing aboveground and underground storage tanks within or adjacent to project's area of potential effect.

**Wetlands**  
Federal regulations require that unavoidable wetland impacts caused by highway construction be mitigated. If you are interested in creating or restoring wetlands on your property, please complete the Wetland Mitigation Registry Form in the handouts.

See Handout

18

## Environmental, Social and Economic Concerns

**Threatened & Endangered Species**

According to the U.S. Fish & Wildlife Service, the following species are known to occur in Hanson County:

- Birds - Whooping Crane & Red Knot
- Mammals - Northern Long-eared Bat
- Fish - Topeka Shiner
- Plants - Western Prairie Fringed Orchid

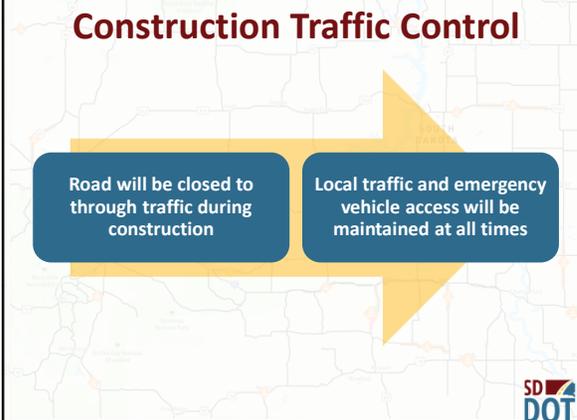

**See Handout**

19

## Construction Traffic Control

Road will be closed to through traffic during construction

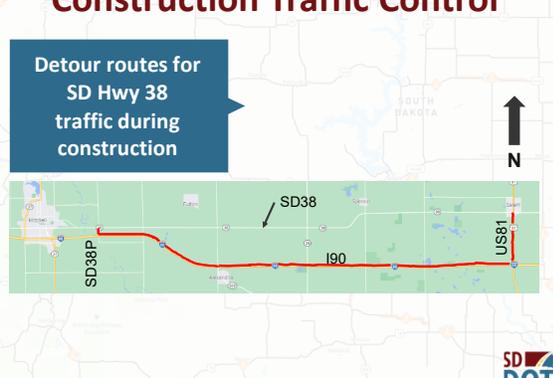

Local traffic and emergency vehicle access will be maintained at all times

20

## Construction Traffic Control

Detour routes for SD Hwy 38 traffic during construction

21

## Landowner Meetings

**Early 2022**

Landowners adjacent to the project will be contacted individually by SDDOT to schedule a meeting

**Discussion Items**

- Driveway locations/widths
- Fences
- Drainage
- Trees
- Temporary Easements or ROW acquisition

**See Handout**

22

## Tentative Project Schedule

Dependent on State/Roadway Safety Improvement Funding

<b>Early 2022</b> Landowner Meetings	<b>2022</b> Final Design	<b>2023-2024</b> ROW Acquisition	<b>2025</b> Construction
---	-----------------------------	-------------------------------------	-----------------------------

23

## Questions or Comments

## DEPARTMENT OF TRANSPORTATION

## Access Management

South Dakota's Commitment to Safety and Smart  
Investment Decisions in Transportation

---

### What is Access Management?

*Access Management* is the process of providing highway entrances only at locations where they can be provided safely and efficiently.

Consider that each access point added to an undivided highway in an urban or suburban area increases the annual crash rate by 11 to 18 percent on that highway segment. In rural areas, each added access point increases the annual crash rate by 7 percent. Overall, driveway-access crashes alone cost South Dakota approximately \$36.5 million each year.

Each additional access point also contributes to congestion. The more driveways on a street the more places where people are slowing, changing lanes and turning. A five-lane street can quickly become a parking lot when there are many driveways in each block. When that happens, our valuable transportation investments are wasted and access to adjacent businesses is restricted.

**Controlled access facilities** are segments of highway where either no access or only limited access to the highway is allowed. Interstate highways are an example of controlled access facilities where no access to the highway is allowed.

Good access depends on the following:

- Limiting the number of conflict points (places where there is a potential for crashes)
- Separating conflict areas
- Reducing interference with through traffic
- Providing good on-site circulation and storage
- Properly spaced traffic signals

### How does Access Management affect businesses?

Studies have shown that access management can provide three benefits to businesses adjacent to highways:

- Making sure that drivers can get in and out of businesses without being blocked by other traffic
- Making the highway more attractive by reducing congestion
- Extending the business' effective service area by reducing travel times

These benefits come not from having many driveways, but by having well-planned, well-located, high-capacity access points on the highway.

Even skeptical business owners have found that proper access management results in an improved business climate, as customers can easily get in and out of their business establishment.

For more information, please contact:

Joseph Sestak  
Access Management Engineer  
5316 W. 60<sup>th</sup> St. N.  
Sioux Falls, SD 57107  
Phone: 605-367-4970 Ext. 1802120

## Right of Way Information

---

### **Individual Landowner Meetings**

During the early stages of the project's design, SDDOT will schedule a meeting with individual landowners having property adjacent to the project. See the following page for an explanation of the landowner meeting.

### **Property Acquisition Offer**

After the project construction plans have been prepared and the right of way limits have been established, you may be contacted by an appraiser or negotiations agent to visit with you for that portion of your property that is needed for construction of the project. Your property will be valued and a written offer presented to you by a negotiating agent who will contact you for an appointment to make the written offer.

### **Relocation Assistance Program**

This program provides a variety of services and payments to owners and tenants who have personal property affected by the right of way being acquired for the project.

Relocation payments are in addition to payments made for the real property being acquired. To preserve your eligibility for payments, do not move property until you have received a written relocation offer or have contacted John Keyes of the SDDOT Right of Way Program in Pierre. His phone number is 605-773-3746. Anyone not satisfied with the relocation offer made to them may appeal using the procedures described in the Relocation Brochure.

The landowner may be reimbursed for various fair and reasonable incidental expenses that may be incurred during the transfer of property to the State depending on impacts to personal property and qualifications.

### **Right of Way Information Brochures**

Two brochures "Better Roads Brochure" and "Relocation Assistance Brochure" have been prepared which explain the SDDOT's Right of Way process. They provide information on your rights regarding the acquisition of your property and the benefits available to you with regard to the Relocation Assistance Program. These brochures are available at this meeting on the "Sign-in" table. Please feel free to take a copy of each with you. These brochures are available at the following SDDOT website: <https://dot.sd.gov/inside-sddot/forms-publications/brochures>

## DEPARTMENT OF TRANSPORTATION

# Individual Landowner Meetings

The purpose of this meeting is to provide you with an opportunity to comment on various issues pertaining to the design of this highway project as it relates to your property.

The following topics will be discussed at the meetings. Please note that not all topics will apply to every property owner.

- Permanent purchase and/or temporary use of your property.
- Locations and widths of entrances to your property: The standard South Dakota Department of Transportation (SDDOT) entrance-width for rural highways is 24 feet. Note: In general, existing entrance widths along rural State Highways are 24 feet or smaller. A maximum width of 40 feet is allowed at locations where it is deemed appropriate and necessary. Entrances in urban areas can vary from 16 feet to 40 feet.

The goal of the SDDOT is to provide property owners located adjacent to the project with the access they need, and at the same time, enhance highway safety and reduce project costs. In some instances, the SDDOT may seek to combine duplicate entrances. For example, if your property has two or three entrances to the same property that are located close to each other, we would ask you to assess your current entrance needs and consider one entrance location that will meet those needs.

- Permanent fencing adjacent to the highway: SDDOT's fencing policy allows for the replacement of all disturbed fence with like-kind fence.

Two fence types are typically installed: **Type 2:** 4-strand barbed wire with 8-inch wire spacing, and **Type 6:** 32-inch woven wire with 1 strand of barbed wire on the bottom and 2 strands of barbed wire on the top. Page 12 of the "Better Roads Brochure" contains added discussion of your permanent fencing options. This brochure will be available at the meeting.

- Temporary fencing adjacent to the highway: Do you anticipate having livestock in pastures located adjacent to the proposed project during highway construction activities?
- Are you aware of any waterlines, drainfields, septic tanks, underground storage tanks, underground power lines, etc. that are located adjacent to the project and may be impacted by construction activities?
- Are there any highway-related drainage or flooding problems located along your property or elsewhere along this section of highway?
- Possible sites for gravel and additional fill material: Are you aware of potential material available for construction that might be located adjacent to the highway?
- Temporary access during construction activities.

Please review your property and be prepared to discuss the above issues, as well as any other issues that you feel are unique to your property. No offers to acquire property will be made at these meetings since revisions to the plans may occur from your input.

## DEPARTMENT OF TRANSPORTATION

## Encroachments in ROW

---

Federal Regulations (CFR 23.1) require that the State Highway Department (SDDOT) will be responsible for preserving such ROW free of all public and private installation, facilities, and encroachments.

No improvements shall be allowed to remain in the ROW unless they are deemed in the best interest of the public and will not impair the highway or interfere with the free and safe flow of traffic.

Encroachments are any private property or improvement in the public ROW that is not approved by permit such as:

- Landscaping Items
- Fence
- Signs
- Buildings
- Etc.

SDDOT Staff will survey the project limits to identify all encroachments. Prior to the project being let to contract, landowners will be contacted by the SDDOT or City Government regarding how each encroachment will be addressed or handled. If it is determined that the removal of an encroachment is required, it will be the landowner's responsibility to remove the encroachment.

For additional information, please contact:

Jay Peppel  
Area Engineer  
SDDOT Mitchell Area Office  
1300 W Norway Ave  
Mitchell, SD 57301  
Phone: 605.995.8120  
E-Mail: [Jay.Peppel@state.sd.us](mailto:Jay.Peppel@state.sd.us)

## DEPARTMENT OF TRANSPORTATION

# Environmental, Social & Economic Impacts and Advanced Utility Coordination

---

### Environmental, Social & Economic Impacts

- Project will comply with all state and federal environmental regulations.
- No splitting of neighborhoods will occur because of this project.
- Project will be coordinated with the following state and federal agencies:
  - SD Dept. of Environment & Natural Resources
  - SD Dept. of Game, Fish & Parks
  - US Fish & Wildlife Service
  - State Historic Preservation Office
  - US Forest Service
- For additional information, please contact:

Kit Bramblee  
Environmental Scientist Manager  
SDDOT Office of Administration  
700 E. Broadway Ave.  
Pierre, SD 57501  
Phone: 605-773-3721  
E-Mail: [Kit.Bramblee@state.sd.us](mailto:Kit.Bramblee@state.sd.us)

### Advanced Utility Coordination

- Highway projects may require adjustments or relocation of existing utilities located along or crossing the highway project. The SDDOT has an "Advanced Utility Coordinating Process" in place that addresses all existing utility involvement. This process involves meeting with the utility owner and project designers to **review** any conflicts and determine the most cost-effective option of changing the design to avoid the existing utility or adjusting the utility. If the utility is required to relocate, all replacement utility easement acquisition and relocation work will be addressed and coordinated between the landowner and the utility company.
- For additional information, please contact:

Kyle McKeever  
Utility Coordinator  
SDDOT Office of Road Design  
700 E. Broadway Ave.  
Pierre, SD 57501  
Phone: 605-773-3433  
E-Mail: [Kyle.McKeever@state.sd.us](mailto:Kyle.McKeever@state.sd.us)

## DEPARTMENT OF TRANSPORTATION

## Wetland Mitigation Registry Form

Federal regulations require that unavoidable wetland impacts caused by highway construction be mitigated. Examples of acceptable wetland mitigation include:

- Wetland creation
- Wetland restoration – plugging an existing, drained wetland
- Wetland enhancement - adding buffer around an existing wetland.

The South Dakota Department of Transportation (SDDOT) may participate in the cost of wetland creation/restoration/enhancement, if the wetland can be used to mitigate wetland impacts caused by highway construction.

If you are interested in creating, restoring, or enhancing wetlands on your property, please complete the attached form and mail to:

Kit Bramblee  
Environmental Scientist Manager  
SDDOT Office of Administration  
700 E. Broadway Ave.  
Pierre, SD 57501

Your name will be added to the SDDOT Wetland Mitigation Registry and a SDDOT representative will contact you with additional information.

**Yes, I am interested in assisting the SDDOT to mitigate wetland impacts by creating or restoring wetlands on my property.**

**Name:** \_\_\_\_\_

**Address:** \_\_\_\_\_

**Phone #:** \_\_\_\_\_ **Email:** \_\_\_\_\_

**Location of property:** \_\_\_\_\_ **1/4 of Section** \_\_\_\_\_

**Township** \_\_\_\_\_, **Range** \_\_\_\_\_, **County** \_\_\_\_\_

**Please note:** Completion of this form does not commit either you or the SDDOT to a mitigation project. It is a statement of interest only.
