

Botpress — The building blocks for building chatbots

What is Botpress ?

Botpress is the standard developer stack to build, run and improve Conversational-AI applications. Powered by natural language understanding, a messaging API and a fully featured studio, Botpress allows developers around the globe to build remarkable chatbots without compromise. a ☐

Out of the box, Botpress includes:

- Administration panel to orchestrate and monitor your chatbots
- Conversation Studio to design a conversation, manage content, code custom integration
- Easy integration with messaging channels (Messenger, WhatsApp, Slack, Teams, Webchat, Telegram, SMS & more)
- Natural Language Understanding
