RFC 2731 ("Encoding Dublin Core Metadata in HTML") Is Obsolete

Abstract

This document obsoletes RFC 2731, "Encoding Dublin Core Metadata in HTML", as further development of this specification has moved to the Dublin Core Metadata Initiative (DCMI).

1. Introduction

[RFC2731] defines "Encoding Dublin Core Metadata in HTML". Newer specifications published by the Dublin Core Metadata Initiative (http://dublincore.org/) over the last decade, in particular "Expressing Dublin Core metadata using HTML/XHTML meta and link elements" ([DC-HTML]), have obsoleted this work.

Note: Implementers of RFC 2731 should note that DC-HTML introduces a new requirement with respect to the use of the "head" element's "profile" attribute.

2. Security Considerations

This document is of administrative nature only and therefore there are no security relations related to it.

3. Normative References
