

## Contents

### TOPIC INTRODUCTIONS

- Introducing Genes into Mammalian Cells: Viral Vectors** 297  
Miguel Sena-Esteves and Guangping Gao  
*Cold Spring Harb Protoc*; 2020; 10.1101/pdb.top095513
- Alkaline Phosphatase** 330  
Michael R. Green and Joseph Sambrook  
*Cold Spring Harb Protoc*; 2020; 10.1101/pdb.top100768

### PROTOCOLS

- Growing Adherent Cells for Staining** 333  
Scott J. Rodig  
*Cold Spring Harb Protoc*; 2020; 10.1101/pdb.prot099614
- Fixing Attached Cells for Staining** 335  
Scott J. Rodig  
*Cold Spring Harb Protoc*; 2020; 10.1101/pdb.prot099689
- Binding Antibodies to Attached Cells or Tissues in Preparation for Staining** 338  
Scott J. Rodig  
*Cold Spring Harb Protoc*; 2020; 10.1101/pdb.prot099705
- Purification of Recombinant Adeno-Associated Viruses (rAAVs) by Cesium Chloride Gradient Sedimentation** 341  
Qin Su, Miguel Sena-Esteves, and Guangping Gao  
*Cold Spring Harb Protoc*; 2020; 10.1101/pdb.prot095604
- Analysis of Recombinant Adeno-Associated Virus (rAAV) Sample Morphology Using Negative Staining and High-Resolution Electron Microscopy** 347  
Gregory Hendricks, Miguel Sena-Esteves, and Guangping Gao  
*Cold Spring Harb Protoc*; 2020; 10.1101/pdb.prot095661
- Analysis of Recombinant Adeno-Associated Virus (rAAV) Purity Using Silver-Stained SDS-PAGE** 351  
Qin Su, Miguel Sena-Esteves, and Guangping Gao  
*Cold Spring Harb Protoc*; 2020; 10.1101/pdb.prot095679

<b>Chromatin Immunoprecipitation</b>	<b>354</b>
James DeCaprio and Thomas O. Kohl	
<i>Cold Spring Harb Protoc</i> ; 2020; 10.1101/pdb.prot098665	
<b>Dephosphorylation of DNA Fragments with Alkaline Phosphatase</b>	<b>365</b>
Michael R. Green and Joseph Sambrook	
<i>Cold Spring Harb Protoc</i> ; 2020; 10.1101/pdb.prot100669	

**Cover Illustration:** Retroviral particle. The illustration is from an article in this issue, in which Miguel Sena-Esteves and Guangping Gao provide an overview of viral vector systems—including retroviruses—for introducing genes into cultured mammalian cells (doi: 10.1101/pdb.top095513).

## General Cautions

The methods in this issue should be used by laboratory personnel with experience in laboratory and chemical safety or students under the supervision of such trained personnel. The procedures, chemicals, and equipment referenced in this issue are hazardous and can cause serious injury unless performed, handled, and used with care and in a manner consistent with safe laboratory practices. Students and researchers using the procedures in this issue do so at their own risk. It is essential for your safety that you consult the appropriate Material Safety Data Sheets, the manufacturers' manuals accompanying equipment, and your institution's Environmental Health and Safety Office, as well as the **General Safety and Disposal Cautions** (see [www.cshprotocols.org/cautions](http://www.cshprotocols.org/cautions)), for proper handling of hazardous materials described in these articles. Cold Spring Harbor Laboratory makes no representations or warranties with respect to the material set forth in these articles and has no liability in connection with the use of these materials.

All registered trademarks, trade names, and brand names mentioned in this issue are the property of the respective owners. Readers should consult individual manufacturers and other resources for current and specific product information. Appropriate sources for obtaining safety information and general guidelines for laboratory safety are provided in the **General Safety and Hazardous Material Information** page online ([www.cshprotocols.org/cautions](http://www.cshprotocols.org/cautions)).
